

## CONGRESSMAN ALLEN'S RETURN.

---

**As Manager of the Centennial-Eureka  
He Will Be Kept Busy.**

Congressman Clarence E. Allen, whose official term expires at high noon tomorrow, arrived from the nation's capital this morning. Mr. Allen, as manager of the great Centennial-Eureka mine, will hereafter devote his undivided attention to the affairs connected with that property, which, if all reports be true, will keep him decidedly busy for at least several months in the immediate future.

It is stated that the Centennial-Eureka company is contemplating the erection at once of a mill for the treatment of its low grade ores. The mill will have a capacity of at least 200 tons daily and the mine will be worked on an extensive scale. Full arrangements concerning the prospective improvements have not yet been made, hence information in detail can not now be given.
