THE LUCIN COPPER COMPANY.

The Lucin Copper Company, operating near Lucin, Box Elder county, Utah, held a special stockholders’ meeting on the 4th inst. and elected a board of directors to serve for the ensuing year as follows: Roger W. Powers, president; D. J. Wheeler, vice president; G. S. Morris, secretary and treasurer; Franklin Riter, P. K. Flynn and Vincent Ergmaga.

The Mining Review is informed that this will be the last stockholders’ meeting to be held in Lucin, as the office of the company has now been established at room 908 Kearns building, Salt Lake City.

Pierre Peugeot, a mining engineer of Salt Lake, recently made an examination of the company’s property in behalf of Salt Lake and New York people.

The physical showing at the mine is reported as being most satisfactory, and it is stated that three feet of solid ore has been exposed in the south drift, while a considerable quantity of manganese ore has been opened in the mine workings. The manganese is being tested at Hazen, Nevada, by the Western Ore Purchasing Company.

At the meeting referred to D. J. Wheeler was retained as general manager for the company.
